

2.1.1

My Body:

Names of body parts: Male

Anus: This is the opening at the end of your digestive track, its where the poo comes out.

Bladder: This is where the body collects and stores urine from the kidneys before you pee.

Foreskin: This is the skin that covers the top of the penis. If it is removed (because it is too tight, or as they do in some religions) this is called circumcision.

Penis: This is the male sexual organ. It is used to pee and to release sperm.

Scrotum: This is the sack of skin that holds the testes.

Testes: These are the male reproductive organs that produce sperm.
